Committee Members:

Officers Absent: Lori Givens, Treasurer

Board Members Absent: David Potter

Call to Order and Opening Remarks by Jerry Duhovic, President at 7:05pm

SeaView Residents Association

Recap of September 6th Community Meeting:

It appears people are not talking to others. Should work with all Organizations, also very important to be well organized. Create a Relationship with Stakeholders as Cal Water and county sewer. Who is in Charge of what? Need early warning of leaks. Also, early detection and Filling in sinkholes. Understand each organization.

Concern over actions to mitigate rainwater diversions and wells to extract Water

How to get representation on the Klondike abatement district.

How to communicate with and understand what has been done and is being done.

Impact upon property values and insurability.

What are actionable items by our association in conjunction with city to address one of the above?

What opportunities are there to enlist volunteers to help with sections of this.

Suggestions of actionable items:

Work with city – to expand upon recent communication by Home Owner/Neighbor Deirdre with KCAD to see how to get Seaview members onto the board.

Assemble via city council/manager a meeting with all of the stakeholders to establish who is responsible for what. (City, Utilities, Abatement districts, county). What are the communication channels each recommends. What is each group doing at present. Have it as an open community meeting.

Ask City to have representatives of communities attend virtually or in person the subcommittee and City Council meetings.

Maximize use of website and email distributions for current information on the topic.
